ENTRA ID GOVERNANCE ACCESS PACKAGE

As an IAM admin, I want to configure access packages containing SAP IAG business roles in Microsoft Entra that end users can request in My Access. Once the request is approved in Microsoft Entra, the request is sent to SAP IAG for approval and provisioning. SAP IAG will notify Microsoft Entra once the provisioning is complete so that Microsoft Entra can fulfill the request for other targets → [Microsoft Entra SAP IAG integration \(Public Preview\)](#)
